Materials:
Silk screen printed acrylic, aluminium, fluorescent lighting

Measurements:
Width: 30 Length: 75cm. Height: 30cm.

Product category:
Lighting

Product status:
One off

Short Texts:
An effective, but atmospheric use of fluorescent lighting.

Long Texts:
Fluorescent lighting need not be encased in stringent design. Many advantages to a long, slender line of light can be found. Radiator consists of an image repeated 50 times. The image could be of anything. The powerful three dimensional effect is the point. Designed for the solo exhibition 'Light Studies' for Louis Poulsen.
