Materials:
Laser cut and deep pressed steel shell, steel frame, rubber coated.

Measurements:
With: 45cm. Height: 92cm. Depth: 45cm.

Product category:
Furniture

Product status:
in production

Short Texts:
Laser cut stacking chair for indoor and outdoor use

Long Texts:
Laser cut stacking chair for indoor and outdoor use. The pattern is a repetition of the construction of the frame beneath, arrayed at an angle infinitely. The reasons for using asymmetry in the pattern are: The design plays with asymmetry which gives the chair a spatial freedom - it is less needy of neat positioning than symmetrical chairs, and has more character. The human body is not symmetrical. Why should a chair be?
